

FINAL ANALYTICAL REPORT

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
* NAL is not certified for these compound by NELAC.

Table with columns: Lab ID, Sample ID, CAS #, ANALYTES, Results, QC, Units, RDL, MDL, Sample Date, Prep. Date, Analysis Date, Matrix, Dil., Weight(g), Vol.(ml), % Solid, Method, Data file, Spike, % Rec, % RPD, Parent. Contains multiple rows of chemical analysis data.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
* NAL is not certified for these compound by NELAC.

Table with columns: Lab ID, Sample ID, CAS #, ANALYTES, Results, QC, Units, RDL, MDL, Sample Date, Prep. Date, Analysis Date, Matrix, Dil., Weight(g), Vol.(ml), % Solid, Method, Data file, Spike, % Rec, % RPD, Parent. Contains 40 rows of analytical data for various compounds like Dichlorodifluoromethane, Chloromethane, Vinyl chloride, etc.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
 * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect
* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: **Bridgeton Landfill**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B = Analyte is found in the associated blank as well as in the sample.
D = Compound identified in an analysis at a secondary dilution factor.
E = Compound's concentration exceeds the calibration range of the instrument at this dilution.
X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
M = Matrix assessment, QC analyses parameter exceeded control limits.
U = Non-detect

* NAL is not certified for these compound by NELAC.

Table with columns: Lab ID, Sample ID, CAS #, ANALYTES, Results, QC, Units, RDL, MDL, Sample Date, Prep. Date, Analysis Date, Matrix, Dil., Weight(g), Vol.(ml), % Solid, Method, Data file, Spike, % Rec, % RPD, Parent. Contains 40 rows of analytical data for various compounds like Dichlorodifluoromethane, Chloromethane, Vinyl chloride, Bromomethane, Chloroethane, Trichlorofluoromethane, 1,1-Dichloroethene, Methylene chloride, Acetone, trans-1,2-Dichloroethene, MTBE, 1,1-Dichloroethane, cis-1,2-Dichloroethene, Bromochloromethane, Chloroform, 1,1,1-Trichloroethane, 2-Butanone, Carbon tetrachloride, Benzene, 1,2-Dichloroethane, Trichloroethene, Dibromomethane, 1,2-Dichloropropane, Bromodichloromethane, cis-1,3-Dichloropropene, Toluene, 4-Methyl-2-pentanone, trans-1,3-Dichloropropene, Tetrachloroethene, 1,1,2-Trichloroethane, Dibromochloromethane, 1,2-Dibromoethane, 2-Hexanone, Ethylbenzene, Chlorobenzene, 1,1,1,2-Tetrachloroethane, p&m-Xylene, o-Xylene, Styrene, Bromoform, Isopropylbenzene, n-Propylbenzene, 1,1,2,2-Tetrachloroethane.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Craig Almanza

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
 - D** = Compound identified in an analysis at a secondary dilution factor.
 - E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
 - X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
 - J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
 - M** = Matrix assessment, QC analyses parameter exceeded control limits.
 - U** = Non-detected
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026

Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect
- * NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Craig Almanza

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detected

* NAL is not certified for these compound by NELAC.
