RE: Project: BRIDGETON LF T1-023
Pace Project No.: 60179262

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 02, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com
Project Manager

QUALIFIERS

Project: BRIDGETON LF T1-023

Pace Project No.: 60179262

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

L0 Analyte recovery in the laboratory control sample (LCS) was outside QC limits.

L3 Analyte recovery in the laboratory control sample (LCS) exceeded QC limits. Analyte presence below reporting limits in associated samples. Results unaffected by high bias.

M0 Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

RE: Project: BRIDGETON LF T1-024
Pace Project No.: 60179403

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 03, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF T1-024

Pace Project No.: 60179403

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON 4337
Pace Project No.: 60179410

Dear DEREK BOUCHARD:

Enclosed are the analytical results for sample(s) received by the laboratory on October 03, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Revised report dated 10/31/2014. Please see Case Narrative.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

PROJECT NARRATIVE

Project: BRIDGETON 4337

Pace Project No.: 60179410

Date: October 31, 2014

Amended report revised 103114 for phenol analyses revision.

This report is re-submitted to correct a reporting error in the originally submitted report. Total Phenols was initially reported at 229 mg/kg for sample 6017941001 (Sludge Truck #5). The result has been corrected to ND with an adjusted reporting level of 6.2 mg/kg and a corrected dilution factor of 10. This dilution was necessary due to colorimetric matrix interference present in the neat analysis, causing the detector to appear saturated. Thus, a 10 fold dilution was necessary. The laboratory apologizes for any inconvenience this may have caused.

QUALIFIERS

Project: BRIDGETON 4337

Pace Project No.: 60179410

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-K Pace Analytical Services - Kansas City

PASI-N Pace Analytical Services - New Orleans

ANALYTE QUALIFIERS

CH The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.

CU The continuing calibration for this compound is outside of Pace Analytical acceptance limits. Analyte presence below reporting limits in associated samples. Results unaffected by high bias.

D3 Sample was diluted due to the presence of high levels of non-target analytes or other matrix interference.

H1 Analysis conducted outside the EPA method holding time.

M6 Matrix spike and Matrix spike duplicate recovery not evaluated against control limits due to sample dilution.

RE: Project: BRIDGETON LF T1-025
Pace Project No.: 60179523

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 04, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

PROJECT NARRATIVE

Project: BRIDGETON LF T1-025

Pace Project No.: 60179523

Date: October 13, 2014

The sample volume received for volatile analysis for leachate sample T1-025 contained head space presence greater than 6mm. Per historical instructions, the analysis is completed and the presence noted.

Results presented on this page are in the units indicated by the "Units" column except where an alternate unit is presented to the right of the result.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, Inc..

QUALIFIERS

Project: BRIDGETON LF T1-025

Pace Project No.: 60179523

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

FINAL ANALYTICAL REPORT

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Table with 24 columns: Lab ID, Sample ID, CAS #, ANALYTES, Results, QC, Units, RDL, MDL, Sample Date, Prep. Date, Analysis Date, Matrix, Dil., Weight(g), Vol.(ml), % Solid, Method, Data file, Spike, % Rec, % RPD, Parent. It contains 24 rows of analytical data for various compounds like Trichloropropane, tert-Butylbenzene, etc.

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Table with 23 columns: Lab ID, Sample ID, CAS #, ANALYTES, Results, QC, Units, RDL, MDL, Sample Date, Prep. Date, Analysis Date, Matrix, Dil., Weight(g), Vol.(ml), % Solid, Method, Data file, Spike, % Rec, % RPD, Parent. It contains 24 rows of analytical data for various compounds like Trichloropropane, Butylbenzene, Dichlorobenzene, etc.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Notes

This report shall not be reproduced, except in full, without the written approval of the laboratory.

PDC Laboratories participates in the following accreditation/certification and proficiency programs at the following locations. Endorsement by Federal or State Governments or their agencies is not implied.

- PIA PDC Laboratories - Peoria, IL
NELAC Accreditation for Drinking Water, Wastewater, Hazardous and Solid Wastes Fields of Testing through IL EPA Lab No. 100230
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 17553
Drinking Water Certifications: Kansas (E-10338); Missouri (870); Wisconsin (998284430); Iowa (240)
Wastewater Certifications: Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
Hazardous/Solid Waste Certifications; Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
UST Certification; Iowa (240)
- SPM PDC Laboratories - Springfield, MO
EPA DMR-QA Program
- STL PDC Laboratories - St. Louis, MO
TNI Accreditation for Wastewater, Hazardous and Solid Wastes Fields of Testing through KS Lab No. E-10389
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 171050
Drinking Water Certifications: Missouri (1050)
Missouri Department of Natural Resources

RE: Project: BRIDGETON LF T1-026
Pace Project No.: 60179586

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 06, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF T1-026

Pace Project No.: 60179586

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON LF T1-027
Pace Project No.: 60179587

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 06, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF T1-027

Pace Project No.: 60179587

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON LF T1-028
Pace Project No.: 60179699

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 08, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

QUALIFIERS

Project: BRIDGETON LF T1-028

Pace Project No.: 60179699

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

- | | |
|----|---|
| 1e | Re-run per request |
| D6 | The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits. |
| H1 | Analysis conducted outside the EPA method holding time. |
| H3 | Sample was received or analysis requested beyond the recognized method holding time. |
| H6 | Analysis initiated outside of the 15 minute EPA recommended holding time. |
| M1 | Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery. |
| N2 | The lab does not hold TNI accreditation for this parameter. |
| R1 | RPD value was outside control limits. |

Notes

This report shall not be reproduced, except in full, without the written approval of the laboratory.

PDC Laboratories participates in the following accreditation/certification and proficiency programs at the following locations. Endorsement by Federal or State Governments or their agencies is not implied.

- PIA PDC Laboratories - Peoria, IL
NELAC Accreditation for Drinking Water, Wastewater, Hazardous and Solid Wastes Fields of Testing through IL EPA Lab No. 100230
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 17553
Drinking Water Certifications: Kansas (E-10338); Missouri (870); Wisconsin (998284430); Iowa (240)
Wastewater Certifications: Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
Hazardous/Solid Waste Certifications; Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
UST Certification; Iowa (240)
- SPM PDC Laboratories - Springfield, MO
EPA DMR-QA Program
- STL PDC Laboratories - St. Louis, MO
TNI Accreditation for Wastewater, Hazardous and Solid Wastes Fields of Testing through KS Lab No. E-10389
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 171050
Drinking Water Certifications: Missouri (1050)
Missouri Department of Natural Resources

RE: Project: BRIDGETON LF T1-029
Pace Project No.: 60179710

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 08, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

QUALIFIERS

Project: BRIDGETON LF T1-029

Pace Project No.: 60179710

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

- | | |
|----|---|
| 1e | Rerun per request |
| D6 | The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits. |
| H1 | Analysis conducted outside the EPA method holding time. |
| H3 | Sample was received or analysis requested beyond the recognized method holding time. |
| H6 | Analysis initiated outside of the 15 minute EPA recommended holding time. |
| M1 | Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery. |
| N2 | The lab does not hold TNI accreditation for this parameter. |
| R1 | RPD value was outside control limits. |

RE: Project: BRIDGETON LF T1-030
Pace Project No.: 60179809

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 09, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

PROJECT NARRATIVE

Project: BRIDGETON LF T1-030

Pace Project No.: 60179809

Date: October 28, 2014

The sample volume received for volatile analysis for leachate sample T1-030 contained head space presence greater than 6mm. Per historical instructions, the analysis is completed and the presence noted.

Amended report revised 10/28/14 to include Percent Total Solids and a secondary analysis for Total Suspended Solids.

QUALIFIERS

Project: BRIDGETON LF T1-030

Pace Project No.: 60179809

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

- | | |
|----|---|
| 1e | Rerun per request |
| D6 | The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits. |
| H1 | Analysis conducted outside the EPA method holding time. |
| H3 | Sample was received or analysis requested beyond the recognized method holding time. |
| H6 | Analysis initiated outside of the 15 minute EPA recommended holding time. |
| HS | Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter). |
| M1 | Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery. |
| N2 | The lab does not hold TNI accreditation for this parameter. |

RE: Project: BRIDGETON LF FLY ASH/SOIL
Pace Project No.: 60179885

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 09, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF FLY ASH/SOIL

Pace Project No.: 60179885

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

RE: Project: BRIDGETON LF T1-031
Pace Project No.: 60179932

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 10, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

Pace Project No.: 60179932

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

RE: Project: BRIDGETON 4337
Pace Project No.: 60179953

Dear DEREK BOUCHARD:

Enclosed are the analytical results for sample(s) received by the laboratory on October 10, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON 4337

Pace Project No.: 60179953

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-K Pace Analytical Services - Kansas City

PASI-N Pace Analytical Services - New Orleans

ANALYTE QUALIFIERS

CL The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

H1 Analysis conducted outside the EPA method holding time.

M6 Matrix spike and Matrix spike duplicate recovery not evaluated against control limits due to sample dilution.

RE: Project: BRIDGETON LANDFILL
Pace Project No.: 60180063

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 11, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com
Project Manager

QUALIFIERS

Project: BRIDGETON LANDFILL

Pace Project No.: 60180063

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

- B** = Analyte is found in the associated blank as well as in the sample.
- D** = Compound identified in an analysis at a secondary dilution factor.
- E** = Compound's concentration exceeds the calibration range of the instrument at this dilution.
- X** = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.
- J** = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.
- M** = Matrix assessment, QC analyses parameter exceeded control limits.
- U** = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
 12976 St. Charles Rock Rd.
 Bridgeton, MO 63044
 ATTN: Brian Power

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

FINAL ANALYTICAL REPORT

Republic Services
12976 St. Charles Rock Rd.
Bridgeton, MO 63044
ATTN: Brian Power

Project #: NAL13-026
Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

Project #: NAL13-026
 Project Site: Bridgeton Landfill

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.

B = Analyte is found in the associated blank as well as in the sample.

D = Compound identified in an analysis at a secondary dilution factor.

E = Compound's concentration exceeds the calibration range of the instrument at this dilution.

X = Estimated value, some aspect of the test relative to this compound did not meet QC criteria. See batch narrative for explanation.

J = Estimated value, compound meets the identification criteria but the result is less than the limit of quantitation but greater than the MDL.

M = Matrix assessment, QC analyses parameter exceeded control limits.

U = Non-detect

RE: Project: BRIDGETON LF T1-033
Pace Project No.: 60180186

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 13, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF T1-033

Pace Project No.: 60180186

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON LF T1-034
Pace Project No.: 60180187

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 13, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown
Angie.Brown@pacelabs.com

QUALIFIERS

Project: BRIDGETON LF T1-034

Pace Project No.: 60180187

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON UNTREATED COMMINGLED
Pace Project No.: 60180206

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 13, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

PROJECT NARRATIVE

Project: BRIDGETON UNTREATED COMMINGLED

Pace Project No.: 60180206

Date: October 21, 2014

The sample volume received for volatile analysis for leachate sample OCT'14 contained head space presence greater than 6mm. Per historical instructions, the analysis is complete and the presence noted.

QUALIFIERS

Project: BRIDGETON UNTREATED COMMINGLED

Pace Project No.: 60180206

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-D Pace Analytical Services - Dallas

PASI-K Pace Analytical Services - Kansas City

BATCH QUALIFIERS

Batch: MSV/65058

[M5] A matrix spike/matrix spike duplicate was not performed for this batch due to insufficient sample volume.

Batch: MSV/65198

[M5] A matrix spike/matrix spike duplicate was not performed for this batch due to insufficient sample volume.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

HS Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

R1 RPD value was outside control limits.

S0 Surrogate recovery outside laboratory control limits.

S3 Surrogate recovery exceeded laboratory control limits. Analyte presence below reporting limits in associated samples. Results unaffected by high bias.

S4 Surrogate recovery not evaluated against control limits due to sample dilution.

pH Post-analysis pH measurement indicates insufficient VOA sample preservation.

NOTE: If Wet Solids are ≥ 0.5 and $< 5\%$ and a small amount of liquid is entrapped in the filter, then determine Percent Dry Solids. If the entrapped liquid is oily (non-aqueous) do not determine Percent Dry Solids. If Solids are $< 0.5\%$, tumbling is not required because the filtrate is considered to be the TCLP/SPLP extract.

- (1) Dry Weight #1 and Dry Weight #2 must be within 1% of each other. If the weights are within 1% of each other, use Dry Weight #2 in further calculations. If not within 1%, continue drying and weighing until two successive weighings are within 1%.
- (2) If compatible, combine the filtered liquid resulting from extraction with the initial liquid phase of sample. If the initial liquid phase is not compatible with the filtered liquid resulting from extraction, do not combine. Analyze liquids separately and combine the results mathematically.

If solids are ≥ 5.0 and $< 100\%$	Weight of waste to charge the ZHE = $\frac{25}{\text{Percent solids}} \times 100$
	Weight of waste to filter = $\frac{\text{mL of leachate required}}{20 \times \text{Percent solids}} \times 100$

RE: Project: BRIDGETON LF T1-035
Pace Project No.: 60180311

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 15, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

QUALIFIERS

Project: BRIDGETON LF T1-035

Pace Project No.: 60180311

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

Notes

This report shall not be reproduced, except in full, without the written approval of the laboratory.

PDC Laboratories participates in the following accreditation/certification and proficiency programs at the following locations. Endorsement by Federal or State Governments or their agencies is not implied.

- PIA PDC Laboratories - Peoria, IL
NELAC Accreditation for Drinking Water, Wastewater, Hazardous and Solid Wastes Fields of Testing through IL EPA Lab No. 100230
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 17553
Drinking Water Certifications: Kansas (E-10338); Missouri (870); Wisconsin (998284430); Iowa (240)
Wastewater Certifications: Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
Hazardous/Solid Waste Certifications; Arkansas (88-0677); Wisconsin (998284430); Iowa (240); Kansas (E-10335)
UST Certification; Iowa (240)
- SPM PDC Laboratories - Springfield, MO
EPA DMR-QA Program
- STL PDC Laboratories - St. Louis, MO
TNI Accreditation for Wastewater, Hazardous and Solid Wastes Fields of Testing through KS Lab No. E-10389
Illinois Department of Public Health Bacteriological Analysis in Drinking Water Approved Laboratory Registry No. 171050
Drinking Water Certifications: Missouri (1050)
Missouri Department of Natural Resources

Q4 The matrix spike recovery result is unusable since the analyte concentration in the sample is greater than four times the spike level. The associated blank spike was acceptable.

RE: Project: BRIDGETON LF T1-036
Pace Project No.: 60180319

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 15, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Angie Brown

QUALIFIERS

Project: BRIDGETON LF T1-036

Pace Project No.: 60180319

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The relative percent difference (RPD) between the sample and sample duplicate exceeded laboratory control limits.

H6 Analysis initiated outside of the 15 minute EPA recommended holding time.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

N2 The lab does not hold TNI accreditation for this parameter.

R1 RPD value was outside control limits.

RE: Project: BRIDGETON LF T1-037
Pace Project No.: 60180438

Dear Ed Galbraith:

Enclosed are the analytical results for sample(s) received by the laboratory on October 16, 2014. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Mary Jane Walls for
Angie Brown

QUALIFIERS

Project: BRIDGETON LF T1-037

Pace Project No.: 60180438

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to changes in sample preparation, dilution of the sample aliquot, or moisture content.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine (8270 listed analyte) decomposes to Azobenzene.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.
