DNR Field Observations

May 24, 2013

Republic Services continues work this afternoon to complete abandonment of LCS-4 with removal of two sections of reinforced concrete pipe. Installation of seven perimeter collection sumps was completed. The wind was primarily from the east-northeast, but was variable throughout the day. Odors have been significant and strong directly to the southwest of the landfill. Some odors were observed at least 1/2 mile west-southwest of the landfill. (Rider Trail S. at Rams Way.)
