Dear Mr. Nagel:

Investigation of Odor Control Technologies – 1st Quarter 2017

This Update on Odor Control Technology Investigation is being submitted by Bridgeton Landfill, LLC (“Bridgeton Landfill”) pursuant to Paragraph 27(C) of the Second Amendment to the First Agreed Order.

Bridgeton Landfill continues to execute state of the art odor control methodologies in the effort to minimize the potential for any off-site emission of odor. This has included continued investigation of new odor control technologies. During the first quarter 2017, the fence odor control system vendor informed Bridgeton Landfill of a potential upgrade to the fence odor control system. This system upgrade would allow for variable output of odor neutralizer and also allow for increased odor neutralizer output. Although the current odor control program and tools have been generally effective at preventing off-site odors, Bridgeton Landfill is tentatively scheduled to install the fence odor control system upgrade during the second quarter 2017 to increase the flexibility with which best management practices can be implemented. Installation of the upgrade during second quarter 2017 is dependent on contractor and parts availability.

Sincerely,

Matt Stewart

Environmental Specialist
