Monthly Data Submittals

October, 2015

Required by Section 52.E of Agreed Order, Case No. 13SL-CC01088
Effective May 13, 2013

Contents:

Provided Separately:

– Flare Raw Data Excel Spreadsheet
– Gas Wellfield Raw Data Excel Spreadsheet

November 20, 2015

Commentary on Data

November 20, 2015

The following observations and comments are offered during this time period:

Gas Volume

- As seen in Attachment B-1, gas collection volumetric rate in for this month averaged 3,522 SCFM, as normalized per the MDNR weekly flow and TRS sampling results.

Gas Quality

- Attachments D and E contain the monthly data related to gas quality as measured at the respective wellheads.

- Attachment E contains gas temperature as measured at the wellheads. Six (6) vertical wells (excluding GIW wells) decreased by 30°F during this reporting period. Additionally, three (3) vertical wells (excluding GIW wells) increased by 30°F or more. Wellhead temperatures at GEW-148 increased from 89.7^{O}F to 172.3^{O}F and GEW-154 increased from 93.7^{O}F to 191.9^{O}F, but are within the range of temperature of nearby vertical landfill gas wells. All remaining wells that exhibited changes greater than 30 degrees are all within the historical gas temperature norms for these wells.

- Attachment E-1 details vertical wells which had oxygen levels over 5% at one or more weekly monitoring events during this reporting period. These consisted of 11 older GEW wells (<#-120) that are experiencing low flows; 16 new GEW wells (>#-120) that are experiencing restricted flows; 8 GIW wells that have low gas flow. By the end of the month, the majority of these wells still exhibited oxygen at the wellhead at or greater than 5%. All these wells, except the new GEWs are low-flow/vacuum sensitive wells with valves only slightly open. On-going tuning, maintenance and pump operation is being performed to manage the oxygen content. These wells are in the south quarry area where the flexible membrane liner cap is in place to prevent atmospheric intrusion into the waste mass.

- A detailed review of the gas extraction wells in the neck area was conducted. Temperature is consistent with previous months in each of the gas extraction wells in vicinity to the neck. Carbon monoxide (CO) results during this reporting period showed stable month-over-month based on historic levels within the GIW wells. The CO concentrations within the Neck Area vertical wells exhibit stable CO concentrations within historic levels.

- All wells in the North Quarry continue to exhibit a maximum wellhead temperature under 145° F during this reporting period with the exception of GEW-054. The only North Quarry wells that had detections of carbon monoxide during this reporting period

were GEW-053 (64 ppm) and GEW-055 (30 ppm) which are within historic levels. Carbon monoxide (CO) results showed non-detect (ND) for all other North quarry wells.

- Review of weekly gas quality in Attachment E reveals that all of the active North Quarry gas wells continue to have low, if any, oxygen and healthy methane and carbon dioxide levels indicating normal wellfield conditions for aged waste at all locations, consistent with GCCS wellfield conditions observed in the North Quarry for some time.

Settlement

- The South Quarry exhibited monthly maximum settlement up to **1.75 feet (see Attachment F)** for this reporting period; which is comparable to last month's rate. The rate of settlement directly south of the neck continues to be small and stable compared to previous months.

Bird Monitoring and Mitigation

- Bridgeton Landfill conducted bird monitoring during this reporting period in accordance with the Approved Bird Hazard Monitoring and Mitigation Plan. Logs of bird population observations were provided to the Airport on a weekly basis. No change in bird population or bird hazards were observed and no bird mitigation measures were necessary.

ATTACHMENT A

WORK COMPLETED AND PLANNED

Bridgeton Landfill, LLC
Monthly Summary of Work Completed and Planned

Work Completed in October 2015

Gas Collection and Control System

- Continued operation and maintenance of GCCS System and GIW wells.
- Continued additional GCCS System enhancements.
- Completed above ground 18 inch header line from CT-1 to CT-2.
- Installed two liquid collection sumps in the South gas interceptor trench.
- Installed above grade LFG header between CT-1 and CT-2.

Alternative Heat Extraction System

- Continued operation and maintenance of the HES.

Leachate Management System

- Continued routine operation of previously installed and upgraded features.

Pre-Treatment Facility

- Continued ongoing operation of facility.
- Continued to optimize operation efficiency of pre-treatment facility.

Work Planned for November 2015

Gas Collection and Control System

- Continue operation and maintenance of GCCS system.
- Continue upgrades to GCCS system as required.
- Plan and Initiate winterization processes.
- Installation of above grade LFG header between CT-3 and CT-30.
- Regrade header from CT-8 to GEW-148.
- Regrade header from CT-30 to ES-3b.

Alternative Heat Extraction System

- Continued operation and maintenance of the HES.

Leachate Management System

- Continued routine operation of previously installed and upgraded features.

Pre-Treatment Facility

- Ongoing operation of facility.
- Continue to optimize operation efficiency of pre-treatment facility.

Other Projects:

- Prep fill projects for north slope of south quarry and low area on east slope
- Begin acceptance of clean fill materials for future fill projects.
- Complete north quarry cap enhancement project.

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G110503-01/02

Enclosed are results for sample(s) received 11/05/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich and Ryan Ayers on 11/09/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager
MJohnson@AirTechLabs.com

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G102803-01/02

Enclosed are results for sample(s) received 10/28/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich, Ryan Ayers, Brian Powers and David Randall, Weaver Consultants, on 10/29/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G102203-01/02

Enclosed are results for sample(s) received 10/22/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- According to the client, results were inconsistent (lower) compared to historical data, which prompted a re-evaluation of the data. It was observed that the NMOC (Non-methane organic compounds) of the samples was at least an order of magnitude higher than historical data. NMOC is not reported for this project, but it is part of the data that is generated. The high amount of NMOC caused a dilution of the other analytes. A GCMS analysis was performed to identify the NMOC. Acetone was the primary component.
- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich, and Ryan Ayers on 10/26/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson

It was observed that the NMOC (Non-methane organic compounds) ofthe samples was at least an order of magnitude higher than historical data. NMOC is not reported for this project, but it is part of the data that is generated. The high amount ofNMOC caused a dilution of the other analytes. A GCMS analysis was performed to identify the NMOC. Acetone was the primary component.

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G101504-01/02

Enclosed are results for sample(s) received 10/15/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich and Ryan Ayers on 10/19/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager

Notes: (1) Based on the comparison of field to laboratory readings, oxygen to balance gas ratios, and historical concentrations, the sample was determined to be suspect due to oxygen introduction which likely occurred during sample collection or laboratory analytical methods. (2) MDNR also collected duplicate LFG samples at these locations during this sampling period. (3) Based on the oxygen verification readings taken with an Envision meter, it was determined there is a sample train leak. (4) Based on the oxygen verification readings taken with an Envision meter, it was determined that the readings are accurate. (5) Flare station gas concentration data is an average of FL-100, FL-120, and FL-140.

Notes: (1) Based on the comparison of field to laboratory readings, oxygen to balance gas ratios, and historical concentrations, the sample was determined to be suspect due to oxygen introduction which likely occurred during sample collection or laboratory analytical methods. (2) MDNR also collected duplicate LFG samples at these locations during this sampling period. (3) Based on the oxygen verification readings taken with an Envision meter, it was determined there is a sample train leak. (4) Based on the oxygen verification readings taken with an Envision meter, it was determined that the readings are accurate. (5) Flare station gas concentration data is an average of FL-100, FL-120, and FL-140.

ND = Analyte not detected in sample.

[2] = Flare Station Inlet measured at EPA Method 2 flow port (blower outlet)

LABORATORY TEST RESULTS

Project Name: Bridgeton Monthly Permit Flare LFG Testing
Project Number: 0120-131-10-27
Lab Number: G100703-01/04

Enclosed are results for sample(s) received 10/07/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results for were e-mailed to David Randall on 10/09/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager
MJohnson@AirTechLabs.com

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G101902-01/34

Enclosed are results for sample(s) received 10/19/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich, and Ryan Ayers on 10/26/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager
MJohnson@AirTechLabs.com

LABORATORY TEST RESULTS

Project Reference: Bridgeton Landfill
Lab Number: G103001-01

Enclosed are results for sample(s) received 10/30/15 by Air Technology Laboratories. Samples were received intact. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

- Unless otherwise noted in the report, sample analyses were performed within method performance criteria and meet all requirements of the NELAC Standards.
- The enclosed results relate only to the sample(s).

Preliminary results were e-mailed to Jim Getting, Mike Lambrich and Ryan Ayers on 10/30/15.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson
Operations Manager

SUMMARY OF ODOR COMPLAINTS

October 1, 2015 – October 31, 2015 / MDNR ODOR COMPLAINTS

Name: Robbin Dailey

Message: Odor logged October 1, 2015, at 2:32 pm strength of 7

Follow-up: Bridgeton Landfill staff performed an odor patrol within half an hour of the time stated in this concern, no odor related to the Bridgeton Landfill was observed.

Name: Michael Dailey

Message: Odor logged October 1, 2015, at 2:33 pm strength of 7

Follow-up: Bridgeton Landfill staff performed an odor patrol within half an hour of the time stated in this concern, no odor related to the Bridgeton Landfill was observed.

Name: Michael Dailey

Message: Odor logged October 1, 2015, at 1:34 pm strength of 5

Follow-up: The following concern coincides with a Bridgeton Landfill odor patrol. No odor related to the Bridgeton Landfill was observed at multiple locations in close proximity to this concern location.

Name: Robbin Dailey

Message: Odor logged October 1, 2015, at 1:34 pm strength of 5

Follow-up: The following concern coincides with a Bridgeton Landfill odor patrol. No odor related to the Bridgeton Landfill was observed at multiple locations in close proximity to this concern location.

Name: Kathy Bell

Message: Odor logged October 1, 2015, at 4:05 pm strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. No odor related to the Bridgeton Landfill was detected during odor patrols performed before and after this concern. No technical disruptions were experienced by Bridgeton Landfill at the time of this concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Kathryn Schlag

Message: Odor logged October 2, 2015, at 10:25 strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff was performing an odor patrol at the time of this concern, no odor related to the Bridgeton Landfill was observed at multiple points in close proximity to this concern location. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 2, 2015, at 5:23 PM strength of 3

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. The location cited in this concern is of significant distance from the Bridgeton Landfill and of far closer proximity to another known odor source that was directly upwind of this location at the time of this concern. No odor was observed during odor patrols on this date.

Name: Audra Richardson

Message: Odor logged October 4, 2015, at 3:00 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. At the time cited in this concern the location given was outside of the downwind pathway of the Bridgeton Landfill. Odor patrols before and after this concern did not observe any odor at multiple points between this location and the Bridgeton Landfill. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 5, 2015, at 8:48 AM strength of 10

Follow-up: The following concern location is the default selection within the boundaries of the Bridgeton Landfill. This is an invalid concern.

Name: Louise Kuhlmann

Message: Odor logged October 5, 2015, at 7:00 AM strength of 7

Follow-up: The following concern location is directly adjacent to another known odor source with frequent off-site odors. Winds at this time were of a low velocity northwestern origin, placing this well upwind of the Bridgeton Landfill. Odor patrols on this date did not observe off-site odor originating from the Bridgeton Landfill.

Name: Rhonda Steelman

Message: Odor logged October 5, 2015, at 2:30 PM strength of 5

Follow-up: The following concern location is directly adjacent to another known odor source with frequent off-site odors. Winds at this time were of a low velocity northwestern origin, placing this well upwind of the Bridgeton Landfill. Odor patrols on this date did not observe off-site odor originating from the Bridgeton Landfill.

Name: NA

Message: Odor logged October 6, 2015, at 8:15 AM strength of 4

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately six hours after the stated observation time. Morning odor patrols by Bridgeton Landfill staff did not detect any odor associated with the Bridgeton Landfill at multiple points in close proximity to this concern location. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 5, 2015, at 4:35 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately twenty hours after the stated observation time. Odor patrols by Bridgeton Landfill staff before and after this concern did not detect any odor associated with the Bridgeton Landfill at multiple points in close proximity to this concern location. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 5, 2015, at 4:35 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately twenty hours after the stated observation time. Odor patrols by Bridgeton Landfill staff before and after this concern did not detect any odor associated with the Bridgeton Landfill at multiple points in close proximity to this concern location. This is not believed to have been a Bridgeton Landfill odor.

Name: Jennifer Strange

Message: Odor logged October 6, 2015, at 5:00 PM strength of 2

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted from a location of significant distance from the Bridgeton Landfill and outside of the downwind pathway of the site. This location was of far closer proximity and directly downwind of two other known odor sources with more frequent off-site emissions than

the Bridgeton Landfill. Bridgeton Landfill odor patrols before and after this concern did not detect any odor related to the Bridgeton Landfill at multiple points between this location and the Bridgeton Landfill. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 7, 2015, at 1:30 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately seven hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Bob LaBeaume

Message: Odor logged October 7, 2015, at 3:15 AM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately six hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Kathy Baumann

Message: Odor logged October 7, 2015, at 5:30 AM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately six hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Martina Sandheinrich

Message: Odor logged October 7, 2015, at 8:21 AM strength of 3

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately eleven hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 8, 2015, at 6:48 AM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. An odor patrol was performed within an hour of receiving this concern. No odor related to the Bridgeton Landfill was observed at this location. As the St. Charles Rock Road is a frequently used pathway for multiple solid waste hauling operations it is possible for this to have originated from such a source. This is not believed to have been a Bridgeton Landfill odor.

Name: Amanda Arseneau

Message: Odor logged October 8, 2015, at 8:05 AM strength of 3

Follow-up: The following concern location is the default selection within the boundaries of the Bridgeton Landfill. This is an invalid concern.

Name: Amanda Arseneau

Message: Odor logged October 8, 2015, at 8:05 AM strength of 3

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately sixteen hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Robbin Dailey

Message: Odor logged October 8, 2015, at 2:45 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately nine hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Michael Dailey

Message: Odor logged October 8, 2015, at 2:45 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately nine hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols

performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Michael Dailey

Message: Odor logged October 7, 2015, at 11:17 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately twelve hours after the stated observation time. Bridgeton Landfill staff did not observe any odor related to the Bridgeton Landfill in odor patrols performed the evening before and the morning after the time cited in this odor concern. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 8, 2015, at 8:00 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately four hours after the stated observation time. Bridgeton Landfill staff performed an odor patrol shortly after the time stated in this concern, no odor related to the Bridgeton Landfill was observed at multiple points between the Bridgeton Landfill and this concern. Winds were of a southwestern origin placing this concern upwind of the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 8, 2015, at 2:39 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. An odor patrol as performed shortly before the time cited in this concern. A garbage odor unassociated with the Bridgeton Landfill was detected at the closest observation point to this concern location. This odor was likely associated with a known nearby odor source and did not originate from the Bridgeton Landfill.

Name: Rhonda Steelman

Message: Odor logged October 8, 2015, at 4:00 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. A garbage odor unassociated with the Bridgeton Landfill was detected during previous odor patrols on this date. This odor was likely associated with a known nearby odor source located to the southwest of this concern location. Winds were of a southwest origin at the time of this concern, placing the Bridgeton Landfill upwind of this location. This was not a Bridgeton Landfill odor.

Name: Rhonda Steelman

Message: Odor logged October 8, 2015, at 6:47 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. A garbage odor unassociated with the Bridgeton Landfill was detected during previous odor patrols on this date. This odor was likely associated with a known nearby odor source located to the southwest of this concern location. Winds were of a southwest origin at the time of this concern, placing the Bridgeton Landfill upwind of this location. This was not a Bridgeton Landfill odor.

Name: Rhonda Steelman

Message: Odor logged October 7, 2015, at 12:48 PM strength of 4

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately twenty eight hours after the stated observation time. Bridgeton Landfill staff performed an odor patrol in the hour before the time cited in this concern and did not observe any off-site odor related to the Bridgeton Landfill. The location cited in this concern is of close proximity to two other known odor sources. This was not a Bridgeton Landfill odor.

Name: Robbin Dailey

Message: Odor logged October 8, 2015, at 7:30 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of the time cited in this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Robbin Dailey

Message: Odor logged October 8, 2015, at 7:30 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of the time cited in this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Michael Dailey

Message: Odor logged October 8, 2015, at 7:30 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of the time cited in this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Robbin Dailey

Message: Odor logged October 8, 2015, at 6:00 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Michael Dailey

Message: Odor logged October 8, 2015, at 6:00 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Koboldt

Message: Odor logged October 8, 2015, at 7:30 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points along the southern boundary of the Bridgeton Landfill. This concern location is eight miles south of the Bridgeton Landfill and winds were of a southwestern origin, placing this location at a significant upwind distance from the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: Tonya Mason

Message: Odor logged October 8, 2015, at 5:49 PM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Tonya Mason

Message: Odor logged October 8, 2015, at 7:54 PM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 8, 2015, at 8:15 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Bridgeton Landfill staff performed an odor patrol within one hour of receipt of this concern. No odor related to the Bridgeton Landfill was observed at observation points in close proximity with this concern location. Winds were of a persistent southwestern origin, placing this location directly downwind of another known odor source with frequent off-site odor. This was not a Bridgeton Landfill odor.

Name: Bob LaBeaume

Message: Odor logged October 9, 2015, at 5:40 AM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately four hours after the stated observation time. The location cited in this concern is to the southwest of the Bridgeton Landfill. Winds have been of a persistent western origin placing this location outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source. This is not believed to have been a Bridgeton Landfill odor.

Name: David Blackwell

Message: Odor logged October 8, 2015, at 8:00 AM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately thirty hours after the stated observation time. Bridgeton Landfill staff performed an odor patrol shortly after the time stated in this concern, no odor related to the Bridgeton Landfill was observed at multiple points between the Bridgeton Landfill and this concern. Winds were of a southwestern origin placing this concern upwind of the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 10, 2015, at 6:55 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. At the time cited in this odor concern winds were of a persistently southern to southwestern origin, placing this location upwind of the Bridgeton Landfill. Odor patrols on this date did not observe any off-site odor related to the Bridgeton Landfill and no technical disruptions with the potential to cause odor occurred. This was not a Bridgeton Landfill odor.

Name: Emily jacobi

Message: Odor logged October 11, 2015, at 8:42 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. At the time cited in this odor concern Bridgeton Landfill staff performed an odor patrol. No odor related to the Bridgeton Landfill was observed at multiple points between this concern location and the Bridgeton Landfill. Winds were of a southern origin, placing this location upwind of the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: Emily jacobi

Message: Odor logged October 10, 2015, at 6:35 PM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately 26 hours from the stated time of observation. At the time cited in this odor concern winds were of a persistently southern to southwestern origin, placing this location upwind of the Bridgeton Landfill. Odor patrols on this date did not observe any off-site odor related to the Bridgeton Landfill and no technical disruptions with the potential to cause odor occurred. This was not a Bridgeton Landfill odor.

Name: Mea Baker

Message: Odor logged October 11, 2015, at 9:08 AM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately 12 hours after the stated time of observation. At the time cited in this concern winds were of a persistent southern origin placing this location at a significant distance upwind of the Bridgeton Landfill. Odor patrols on this date did not observe any off-site odor related to the Bridgeton Landfill and no technical disruptions with the potential to cause odor occurred. This was not a Bridgeton Landfill odor.

Name: Mea Baker

Message: Odor logged October 11, 2015, at 9:11 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately 26 hours from the stated time of observation. At the time cited in this odor concern winds were of a persistently southern to southwestern origin, placing this location at a substantial distance upwind of the Bridgeton Landfill. Odor patrols on this date did not observe any off-site odor related to the Bridgeton Landfill and no technical disruptions with the potential to cause odor occurred. This was not a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 12, 2015, at 5:47 AM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southern origin throughout the morning on this date. No odor related to the Bridgeton Landfill was observed off-site during daily odor patrols. This is not believed to have been a Bridgeton Landfill odor and likely originated from another odor source located to the west of the Bridgeton Landfill.

Name: Robbin Dailey

Message: Odor logged October 12, 2015, at 12:15 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent western origin at the time cited in this concern, placing this location upwind of the Bridgeton Landfill. No odor related to the Bridgeton Landfill was observed off-site during odor patrols performed approximately two hours before and two hours after (immediately following receipt of this concern) the time cited in this concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Michael Dailey

Message: Odor logged October 12, 2015, at 12:15 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent western origin at the time cited in this concern, placing this location upwind of the Bridgeton Landfill. No odor related to the Bridgeton Landfill was observed off-site during odor patrols performed approximately two hours before and two hours after (immediately following receipt of this concern) the time cited in this concern. This is not believed to have been a Bridgeton Landfill odor.

Name: Rhonda Steelman

Message: Odor logged October 12, 2015, at 8:18 AM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: Jaclin Klaus

Message: Odor logged October 12, 2015, at 7:00 PM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. The concern was received approximately five hours after the cited observation time. An odor patrol occurred two hours after the cited observation time and did not observe any Bridgeton Landfill related odor off-site. Winds were of a generally western origin at the time of this concern. This location is of a substantial distance west of the Bridgeton Landfill and directly adjacent to another known odor source. This is not believed to have been a Bridgeton Landfill odor.

Name: David Blackwell

Message: Odor logged October 10, 2015, at 9:00 AM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately three days after the stated observation date. An odor patrol was performed by Bridgeton Landfill staff before, during, and after the time cited in this observation. No odor related to the Bridgeton Landfill was observed during this patrol. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 13, 2015, at 8:55 AM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: Bob LaBeaume

Message: Odor logged October 13, 2015, at 12:30 PM strength of 9

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was received approximately two hours after the cited time of observation. Bridgeton Landfill odor patrols performed before and after the cited observation time did not observe any odor related to the Bridgeton Landfill at multiple points between this location and the Bridgeton Landfill. This is not believed to have been a Bridgeton Landfill odor.

Name: Sharon Bishop

Message: Odor logged October 13, 2015, at 3:57 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. An odor patrol was performed shortly before the time cited in this concern. No odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: BobLabeaume

Message: Odor logged October 13, 2015, at 6:48 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds at the time of this concern were of a due west origin, placing this location well outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source with an observed odor during Bridgeton Landfill odor patrols performed on this evening. That was the likely source of this odor and not the Bridgeton Landfill.

Name: NA

Message: Odor logged October 13, 2015, at 8:27 PM strength of 8

Follow-up: The following concern lacks appropriate location data.

Name: Emily jacobi

Message: Odor logged October 13, 2015, at 9:19 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds at the time of this concern were of a due west origin, placing this location well outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source with an observed odor during Bridgeton Landfill odor patrols performed on this evening. That was the likely source of this odor and not the Bridgeton Landfill.

Name: Mea Baker

Message: Odor logged October 13, 2015, at 6:00 PM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds at the time of this concern were of a due west origin, placing this location well outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source with an observed odor during Bridgeton Landfill odor patrols performed on this evening. That was the likely source of this odor and not the Bridgeton Landfill.

Name: Mea Baker

Message: Odor logged October 12, 2015, at 9:00 AM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern was submitted approximately 36 hours after the stated observation time. Winds were of a western origin at this date and time placing this location well upwind of the Bridgeton landfill. An odor patrol was performed within the hour of this concern and no odor related to the Bridgeton Landfill was observed off-site. This was not a Bridgeton Landfill odor.

Name: Desiree Friedrich

Message: Odor logged October 13, 2015, at 9:51 PM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: Kandice

Message: Odor logged October 13, 2015, at 9:58 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern cited a location of significant distance from the Bridgeton Landfill during a period that places the location well upwind of the Bridgeton Landfill. An odor patrol on this evening did not detect Bridgeton Landfill odors off-site. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 13, 2015, at 11:15 PM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: NA

Message: Odor logged October 13, 2015, at 3:48 PM strength of 2

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. An odor patrol was performed minutes before the stated time of this concern. No odor related to the Bridgeton Landfill was observed at multiple points between the Bridgeton Landfill and this location. This was not a Bridgeton Landfill odor.

Name: Katie Roach

Message: Odor logged October 13, 2015, at 8:50 PM strength of 4

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds at the time of this concern were of a due west origin, placing this location well outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source with an observed odor during Bridgeton Landfill odor patrols performed on this evening. That was the likely source of this odor and not the Bridgeton Landfill.

Name: Leslie McQueen

Message: Odor logged October 13, 2015, at 10:38 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds at the time of this concern were of a due west origin, placing this location well outside the downwind pathway of the Bridgeton Landfill and directly downwind of another known odor source with an observed odor during Bridgeton Landfill odor patrols performed on this evening. That was the likely source of this odor and not the Bridgeton Landfill.

Name: Rose Eichholz

Message: Odor logged October 14, 2015, at 6:41 AM strength of 8

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. At the time cited in this concern winds were of a northern origin placing this location outside the downwind corridor of the Bridgeton Landfill. An odor patrol was performed approximately one hour after receipt of this concern, no odor related to the Bridgeton Landfill was observed at multiple points between this concern location and the Bridgeton Landfill. This is not believed to have been a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 14, 2015, at 7:00 AM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. At the time cited in this concern winds were of a northern origin placing this location outside the downwind corridor of the Bridgeton Landfill. An odor patrol was performed approximately one hour after receipt of this concern, no odor related to the Bridgeton Landfill was observed at

multiple points between this concern location and the Bridgeton Landfill. This is not believed to have been a Bridgeton Landfill odor.

Name: Marcy

Message: Odor logged October 14, 2015, at 4:20 PM strength of 9

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. An odor patrol was performed within the hour cited in this concern despite submittal of this concern occurring approximately six hours later. The patrol observed no odor related to the Bridgeton Landfill off-site. This was not a Bridgeton Landfill odor.

Name: Marcy

Message: Odor logged October 14, 2015, at 10:03 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southwestern origin on this evening, placing this location well upwind of the Bridgeton Landfill. An odor patrol in close timing with this concern observed a non-Bridgeton Landfill odor at a location downwind of another known odor source located to the west of this concern's location. This was the likely source and not the Bridgeton Landfill.

Name: Lindsay Mercer

Message: Odor logged October 14, 2015, at 8:08 PM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southwestern origin on this evening, placing this location well upwind of the Bridgeton Landfill. An odor patrol in close timing with this concern observed a non-Bridgeton Landfill odor at a location downwind of another known odor source located to the west of this concern's location. This was the likely source, not the Bridgeton Landfill.

Name: NA

Message: Odor logged October 14, 2015, at 10:10 PM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: Ashlee

Message: Odor logged October 14, 2015, at 10:22 PM strength of 5

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southwestern origin on this evening, placing this location well upwind of

the Bridgeton Landfill. An odor patrol in close timing with this concern observed a non-Bridgeton Landfill odor at a location downwind of another known odor source located to the west of this concern's location. This was the likely source, not the Bridgeton Landfill.

Name: Meghan Cousino

Message: Odor logged October 14, 2015, at 10:49 PM strength of 7

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southwestern origin on this evening, placing this location well upwind of the Bridgeton Landfill. An odor patrol in close timing with this concern observed a non-Bridgeton Landfill odor at a location downwind of another known odor source located to the west of this concern's location. This was the likely source, not the Bridgeton Landfill.

Message: Odor logged October 15, 2015, at 12:40 AM strength of 10

Follow-up: The following concern lacks appropriate location data.

Name: Michelle Stacy

Message: Odor logged October 14, 2015, at 8:15 PM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were of a persistent southwestern origin on this evening, placing this location well upwind of the Bridgeton Landfill. An odor patrol in close timing with this concern observed a non-Bridgeton Landfill odor at a location downwind of another known odor source located to the west of this concern's location. This was the likely source, not the Bridgeton Landfill.

Name: philip

Message: Odor logged October 15, 2015, at 6:37 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. This concern location is of a substantial distance to the southwest of the Bridgeton Landfill. Winds were still at the time of this concern. An odor patrol performed the morning of this concern observed a garbage/trash odor at multiple locations unrelated to the Bridgeton Landfill. No off-site odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 15, 2015, at 7:01 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were still at the time of this concern. An odor patrol performed the morning of this concern observed a garbage/trash odor at multiple locations unrelated to the Bridgeton Landfill, including at an observation point in close proximity to this concern location. No off-site odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: Kathy Bell

Message: Odor logged October 15, 2015, at 6:52 AM strength of 6

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were still at the time of this concern. An odor patrol performed the morning of this concern observed a garbage/trash odor at multiple locations unrelated to the Bridgeton Landfill, including at an observation point in close proximity to this concern location. No off-site odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: Denise Heinle

Message: Odor logged October 15, 2015, at 6:53 AM strength of 10

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were still at the time of this concern. An odor patrol performed the morning of this concern observed a garbage/trash odor at multiple locations unrelated to the Bridgeton Landfill,

including at an observation point in close proximity to this concern location. No off-site odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: Glenn Ferrer

Message: Odor logged October 15, 2015, at 6:45 AM strength of 2

Follow-up: The following concern has been investigated by Bridgeton Landfill staff. Winds were still at the time of this concern. An odor patrol performed the morning of this concern observed a garbage/trash odor at multiple locations unrelated to the Bridgeton Landfill. This location is of a significant distance from the Bridgeton Landfill. No off-site odor related to the Bridgeton Landfill was observed. This was not a Bridgeton Landfill odor.

Name: Becky Elledge

Message: Odor logged October 15, 2015, at 8:12 AM strength of 8

Follow-up: The following concern lacks appropriate location data.

Name: Lauren Brown

Message: Odor logged October 15, 2015, at 7:30 AM strength of 7

Follow-up: On the date of this concern winds were of a persistent southern origin placing the cluster of concerns received predominantly of an upwind location to the Bridgeton Landfill and downwind of other known odor sources. A garbage odor was noticed at multiple points throughout the area likely originating from one potential source. These were not Bridgeton Landfill odors. (encompasses all odor concerns for the October 15, 2015 date).

Name: Renee Thompson

Message: Odor logged October 16, 2015, at 9:06 AM strength of 7

Follow-up: Bridgeton Landfill staff investigated this odor concern shortly after receipt. No odor related to the Bridgeton Landfill was observed.

Name: NA

Message: Odor logged October 17, 2015, at 8:00 AM strength of 8

Follow-up: On October 18th 2015 a total of 15 concerns were received with all but one dated on October 17th or 18th (the other on the 15th). No odor originating from the Bridgeton Landfill was observed during these dates during multiple odor patrols. As a large number of these concerns fail to list a correct location and/or have significant time lapse in stated observation to

submittal time these concerns are of dubious authenticity and are not the result of a Bridgeton Landfill odor.

Name: Amanda Arseneau

Message: Odor logged October 19, 2015, at 4:10 PM strength of 2

Follow-up: The following concern is immediately adjacent to another known odor source during a period of southern winds placing this upwind of Bridgeton Landfill and downwind from that other source. This was not a Bridgeton Landfill odor.

Name: Tonya Mason

Message: Odor logged October 20, 2015, at 2:20 AM strength of 10

Follow-up: The following concern is immediately adjacent to another known odor source during a period of southern winds placing this upwind of Bridgeton Landfill and downwind from that other source. This was not a Bridgeton Landfill odor.

Name: Debi Disser

Message: Odor logged October 20, 2015, at 3:30 AM strength of 7

Follow-up: No odor related to the Bridgeton Landfill was observed during multiple odor patrols before and after this date. No technical disturbances with the potential to cause odor occurred during this time period. Odor from other non-Bridgeton Landfill sources resulted in concern submittals at other nearby locations. This is not believed to have been a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 20, 2015, at 6:15 AM strength of 4

Follow-up: The following concern lacks necessary location data.

Name: Jennifer Woodman

Message: Odor logged October 19, 2015, at 8:30 PM strength of 9

Follow-up: The following concern is of a significant distance from the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: Natalie Brenton

Message: Odor logged October 20, 2015, at 9:32 AM strength of 10

Follow-up: The following concern is directly adjacent to another known odor source with frequent observations form the other odor source at this location. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 20, 2015, at 9:40 AM strength of 6

Follow-up: The following concern is immediately adjacent to another known odor source during a period of southern winds placing this upwind of Bridgeton Landfill and downwind from that other source. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 20, 2015, at 8:00 AM strength of 10

Follow-up: The following concern is of significant distance from the Bridgeton Landfill. Odor patrols performed within the hour of this concern did not notice any odor related to the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: Tina Layne

Message: Odor logged October 19, 2015, at 12:31 AM strength of 7

Follow-up: The following concern is of significant distance from the Bridgeton Landfill. Odor patrols performed within close chronological proximity of this concern did not notice any odor related to the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 20, 2015, at 2:00 PM strength of 6

Follow-up: The following concern is of significant distance from the Bridgeton Landfill during a period of generally southern winds. This was not a Bridgeton Landfill odor.

Name: Amanda Arseneau

Message: Odor logged October 20, 2015, at 5:08 PM strength of 3

Follow-up: The following concern is of significant distance from the Bridgeton Landfill during a period of generally southern winds. This was not a Bridgeton Landfill odor.

Name: Tina Layne

Message: Odor logged October 20, 2015, at 11:17 PM strength of 3

Follow-up: The following concern is of significant distance from the Bridgeton Landfill. This was not a Bridgeton Landfill odor.

Name: NA

Message: Odor logged October 20, 2015, at 4:57 PM strength of 7

Follow-up: The following concern is immediately adjacent to another odor source from the Bridgeton Landfill during a period of generally southern winds, placing it upwind of the Bridgeton Landfill and downwind from that other source. This was not a Bridgeton Landfill odor.

Name: Jason Reynolds

Message: Odor logged October 20, 2015, at 6:22 AM strength of 8

Follow-up: The following concern is immediately adjacent to another odor source from the Bridgeton Landfill during a period of generally southern winds, placing it upwind of the Bridgeton Landfill and downwind from that other source. This was not a Bridgeton Landfill odor.

Name: Jason Reynolds

Message: Odor logged October 21, 2015, at 8:00 AM strength of 8

Follow-up: On October 21st, 2015 multiple concerns were submitted clearly related to a non-Bridgeton Landfill odor. Locations were consistently upwind of Bridgeton Landfill or of significantly remote distance. These were not the result of any Bridgeton Landfill odors.

Name: NA

Message: Odor logged October 22, 2015, at 8:00 AM strength of 10

Follow-up: Over the last week of October a multitude of concerns either lacking location data, listing a location of significant distance from the Bridgeton Landfill, or a location directly upwind of the Bridgeton Landfill at the time of the submittal were received. Investigation of these concerns indicates that these were likely the result of community action group efforts to drive odor concerns and either not related to true odor observations or were other sources of odor being misappropriated to the Bridgeton Landfill.
