APPLICABILITY

1. This permit authorizes the construction of gravity sewer extensions, force mains, and lift stations. Non-earthen flow equalization storage basins at lift stations and inline storage, which flows back into the lift station or collection system, are also included.

2. A site specific sewer extension construction permit may be required by the Department due to compliance and enforcement actions.

3. Projects located within an Approved Sewer Program as noted in the operating permit of the receiving wastewater treatment facility are not required to obtain a construction permit from the Department of Natural Resources (Department).

4. This permit does not apply to:
   A. Earthen storage basins;
   B. Exempt projects unless requested by the applicant or required by enforcement.

PREREQUISITES:

1. The General Sewer Extension Construction Permit application, appropriate fee, and documentation in accordance with 10 CSR 20-6.010(5)(G).

2. The plans and specifications each signed and sealed by a professional engineer registered in the State of Missouri in accordance with 10 CSR 20-8 and 10 CSR 20-6.010.

3. The Design Certification form or Engineering Report or Summary of Design signed and sealed by a professional engineer registered in the State of Missouri certifying the design of the system was prepared in accordance with 10 CSR 20-6 and 10 CSR 20-8.

5. A statement from the continuing authority, as defined in 10 CSR 20-6.010, accepting the responsibility for operation and maintenance of these facilities.

PERMIT CONDITIONS:

1. This permit authorizes the activities and scope of work detailed in the plans and specifications submitted with the request.

2. The construction must be in accordance with the final plans and specifications approved by the Department.

3. State and Federal Law does not permit bypassing of raw wastewater; therefore steps must be taken to ensure that raw wastewater does not discharge during construction. If a sanitary sewer overflow or bypass occurs, report the appropriate information to the Department’s regional office per 10 CSR 20-7.015(9)(E)2., or through the Online Bypass/SSO Reporting system found at https://dnr.mo.gov/eservices.htm under Water Protection.
PERMIT CONDITIONS: (continued)

4. Protection of drinking water supplies must meet the requirements of 10 CSR 23-3.010.  
   A. There shall be no physical connections between a public or private potable water  
      supply system and a sewer, or appurtenance thereto, which would permit the  
      passage of any wastewater or polluted water into the potable supply.  
   B. Sewers shall be laid at least fifty feet (50’) in a horizontal direction from any  
      existing or proposed public water supply well or other water supply sources or  
      structures.

5. Manholes shall be located with the top access at or above grade level.

6. In addition to the requirements for a construction permit, see 10 CSR 20-6.200 for land  
   disturbance requirements to obtain a Missouri State Operating Permit to discharge  
   stormwater. The permit requires Best Management Practices sufficient to control runoff  
   and sedimentation to protect waters of the state. Land disturbance permits will only be  
   obtained by means of the Department’s ePermitting system available online at  
   See www.dnr.mo.gov/env/wpp/stormwater/sw-land-disturb-permits.htm for more  
   information.

7. A United States (U.S.) Army Corps of Engineers (COE) permit (404) and a Water Quality  
   Certification (401) issued by the Department or permit waiver may be required for the  
   activities described in this permit. This permit is not valid until these requirements are  
   satisfied. If construction activity will disturb any land below the ordinary high water mark of  
   Jurisdictional Waters of the U.S. then a 404/401 will be required. Since the COE makes  
   determinations on what is jurisdictional, you must contact the COE to determine permitting  
   requirements. You may call the Department’s Water Protection Program at 573-751-1300 for  
   more information.  
   See www.dnr.mo.gov/env/wpp/401/ for more information.

   Department, then a full closure plan shall be submitted with a Facility Closure Request Form,  
   Form – MO 780-2512 to the Department’s appropriate regional office for review and  
   approval. In accordance with 10 CSR 20-6.010(12), the closure plan must meet the requirements  
   outlined in Standard Conditions Part III, of the Missouri State Operating Permit. Closure shall not  
   commence until the submitted closure plan is approved by the Department.

9. If this project is part of a project to resolve an enforcement action or is receiving funding

   construction
